Performance

**Manufacturing Excellence
for the Oil & Gas
Industry**

The Industry's finest plunger

MECHANICAL PROPERTIES	CORE-X Ductile	Competitive Standard	
		1018	1045
Tensile Strength (psi/ksi)	65,000	58,000	81,900
Yield Strength (psi/ksi)	45,000	31,900	45,000
Elongation (% in 2")	12%	25%	16%
Hardness - Average (BHN)	180	116	163
Weight Reduction	92%	100%	100%

EXCELLENCE

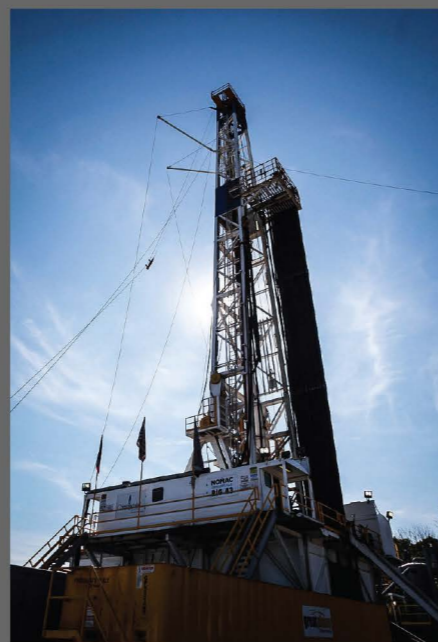

SERVICE

VALUE

CORE-X PLUNGERS

- Are manufactured in the USA using superior cores and proprietary engineered coatings.
 - Standard NiCr Blends
 - Tungsten Blends
 - Custom Blends for highly corrosive/abrasive well stimulation activities
- Deliver superior wear and performance properties in the field.
- Reduce end-user's total cost of operations by extending production uptime.
- Can be engineered to the end-user's specific well attributes to maximize performance and reduce wear during extended high pressure pumping operations.
- SteelTex is a valued and reliable partner with steady-stream production capacity.

- Metallurgically bonded coatings
- Harder working surface with superior wear resistance
- High surface finish qualities
- Certified Core-X quality control
- Proprietary customer specifications protected and supported
- Engineered coating blends for specialized well applications available

Production Manufacturing

Solution-Oriented Engineered Designs

Based in the Dallas/Fort Worth area, SteelTex specializes in precision manufacturing of high performance flame fused plungers, pony rods, manifolds and power frames for the oil and gas industry. SteelTex is a leading supply chain partner for North American OEMs and distributors.

SteelTex is the exclusive manufacturer of the Core-X Plunger and Core-X line of products; these high performance plungers are designed to exceed industry standards while delivering robust cost savings and reduced total cost of operations.
