

Mux Clamp

Riser Clamps & Mux Clamps

Multiple designs are available for steel and aluminum risers. We have individual clamps that can be bundled together and we have semi-clamp designs that can be strapped with metallic or Kevlar strapping or bolted together. We also have a complete 360 degree custom hinge design. In addition, we can offer custom caps and inserts to allow total flexibility for moving the location of the C&K and hydraulic lines from riser to riser. Piggyback clamps are designed with a single split line on the base to allow for easy installation.

We make our own inserts for all clamps

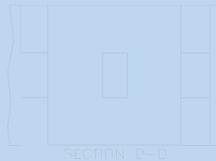

Bonded Pistons & Valve Seats

Enjoy the best of both worlds. Our standard design outperforms most premium offerings and our new high temperature option is head and shoulders above the pack. Our worldwide field test data shows our superiority. We supply retrofit and custom designs. Colors are no problem along with custom packaging. Let us know what your performance requirements are and we will design a competitive package that exceeds your expectations.

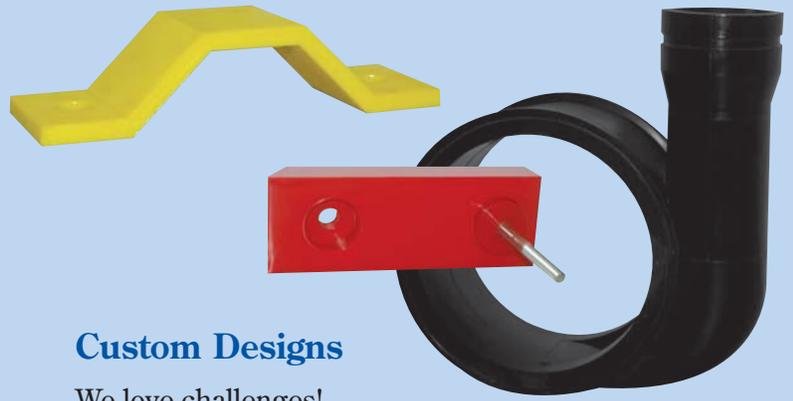

Challenge us

to exceed your riser clamp, shim and protector requirements... easier installation, higher strength, longer life and UV protection.

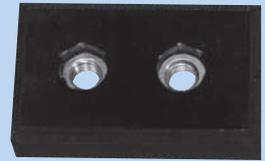

Hydrocyclones

We design and test complete systems to exceed your pressure requirements. We provide clamps and unique joint designs that allow you to gain market share. Our materials are compatible with drilling and service fluids.

Custom Designs

We love challenges! We can take your idea or concept and turn it into reality. We blend PTFE, Nitrile Fibers, or Carbon Fibers to help enhance our urethane offerings. Our state of the art machine shop works with exotic materials and can offer metal and thermoplastic inserts for your one stop offering.

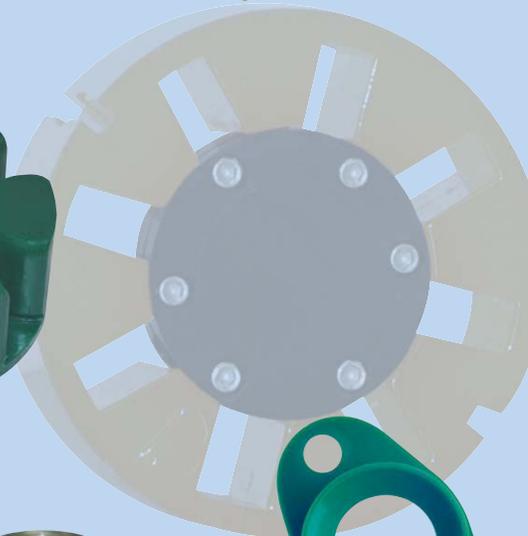

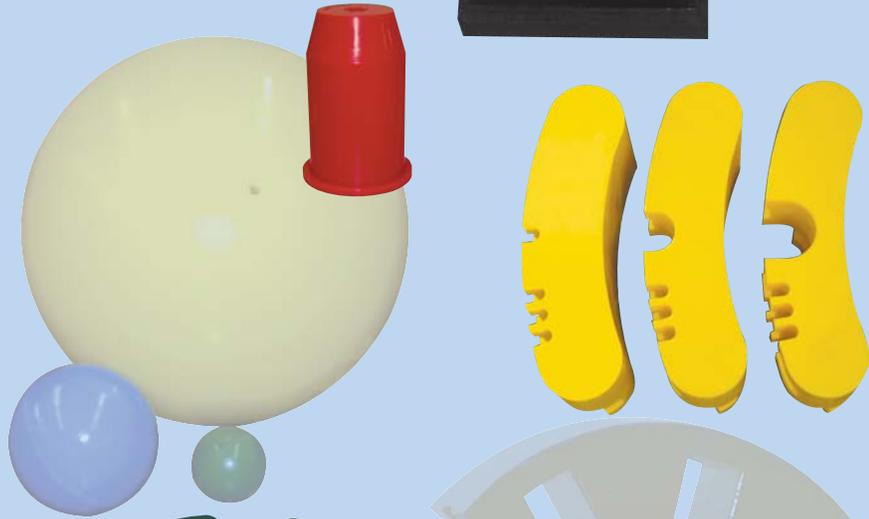

Complete Assembly Available

Sight Glass

Pipe Protectors, Centralizers & Riser Shims

Our designs have incorporated the best in material and geometry selections to maximize your performance. We utilize a soft 35 Shore "A" material on the I.D. with an indestructible rugged 73 Shore "D" on the outer shell. Have your sales representative review the material property sheets. These amazing materials provide the protection required on drilling platforms. In addition, they allow you to stack riser joints plus provide a material handling component when you move the riser from horizontal to the vertical position.

Bend Restrictor

Protector

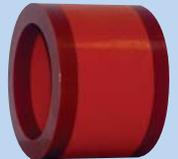

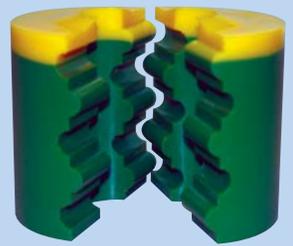

Stock Shapes

We offer a complete line of superior urethane sheet, rod and tubes. Each day, customers not only replace standard urethanes with our high performance materials, but they also challenge phenolic, nylons, nitrile and composites. Please refer to our stock shape price list and compatibility guide.

Materials

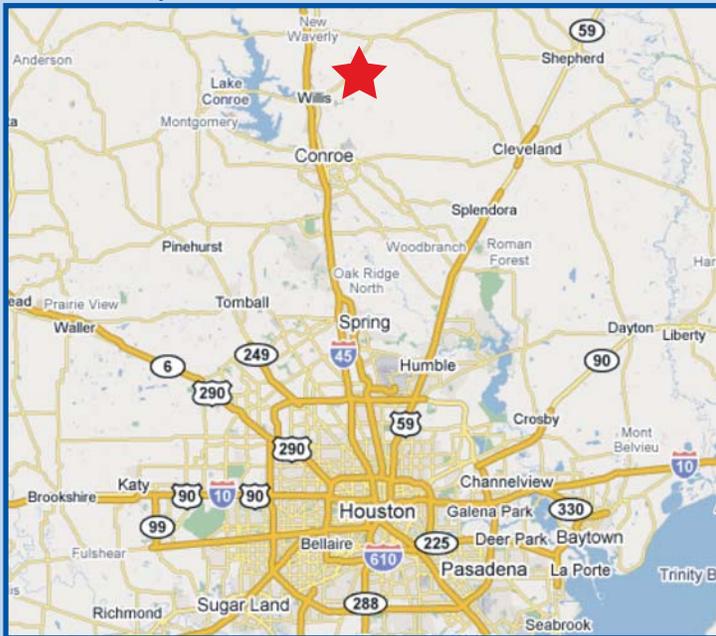

We have the most extensive line of material offerings starting at 10 Shore "A" to 80 Shore "D" and we can also mold dual durometer. Our closed and open foam urethane technology will help you surpass design challenges. We offer a line of standard colors but we can also custom blend. On the cutting edge, we are always developing new materials along with manufacturing technology breakthroughs. Another option is UV stabilization, which can be added for longer outdoor requirements. Some of our standard materials are as follows:

Material Typical Data

	Cones	Clamps	High Temp	Protectors
Hardness	95 Shore "A"	62 Shore "D"	55 Shore "D"	73 Shore "D"
100% Modulus	2,075	300	1,700	4,650
Tensile	6,758	4,400	6,600	9,000
Tear Strength	1,100	180	150	110
Temp	-40 to 275°F	-40 to 275°F	-20 to 350°F	-83 to 300°F

Conveniently located 40 miles north of Houston on I-45

Go Green

Environmentally conscious, we also have earth friendly materials available.
